On-Page SEO Introduction

10.1

Question: Pick any one of your favorite apps (like Zomato, Flipkart, or BookMyShow) and write an optimized HTML <title> tag for its homepage that includes the main keyword users would search for.

Answer:

<title>Zomato - Food Delivery & Online Restaurant Booking</title>

10.2

Question: Write a meta description (under 155 characters) for a new playlist page on a music app like Spotify, making sure it is catchy and includes relevant keywords for better SEO.

Answer:

<meta name="description" content="Listen to the latest Bollywood songs, trending hits and popular music playlists on Spotify. Discover new music and enjoy your favorite songs.">

Character Count: Under 155 characters.

10.3

Question: Create a short HTML snippet for a food delivery app's homepage that uses proper heading tags (H1 for the main headline, H2 for a subheading, and H3 for a section title) to organize the content.

Answer:

```
<!DOCTYPE html>
<html>
<head>
   <title>Online Food Delivery</title>
</head>
<body>

   <h1>Order Food Online</h1>

   <h2>Delicious Food Delivered to Your Door</h2>
```

```
    <h3>Popular Restaurants Near You</h3>

</body>
</html>
```

10.4

Question: Use a free online SERP snippet preview tool (like https://serpsim.com/) to check how your title and meta description from previous tasks would appear in Google search results, then adjust them to avoid getting cut off.

Answer:

Final SEO Title:

<title>Zomato - Food Delivery & Restaurant Booking</title>

Title Length: Approximately 45 characters — suitable for search results.

Final Meta Description:

<meta name="description" content="Discover trending Bollywood songs and playlists on Spotify. Listen to your favorite music and find new songs to enjoy anytime.">

Meta Description Length: Under 155 characters — suitable for search results.

SERP Optimization: The title and meta description are concise, contain relevant keywords, and are less likely to be truncated in Google search results.
