Ranking Factors

1. Product Page Analysis – Wireless Headphones

Example: Amazon wireless headphones product page

On-Page Element	Why It Matters for SEO
Product Title	A clear title containing the product name and important attributes helps search engines understand what the page sells.
Detailed Product Description	Useful, original product information gives Google more relevant content to understand and potentially rank.
Product Specifications	Structured details such as battery life, connectivity, and compatibility help answer specific search queries.
Customer Reviews	Fresh, user-generated content can add relevant language and product information to the page.
Image Alt Text	Descriptive alternative text helps search engines understand product images and improves accessibility.

Key Point: SEO is not just about adding keywords. **Helpful product information and a strong user experience** are equally important.

---

2. Ranking Factors for a Food Delivery App

Ranking Factor	Importance	Why It Matters
Page Speed	**High**	Faster pages provide a better experience, especially for users browsing restaurants on mobile devices.
Mobile-Friendliness	**High**	Most food searches and orders happen on smartphones, so mobile usability is essential.
Keyword Usage	**High**	Relevant phrases such as “food delivery,” “restaurants near me,” and cuisine names help match search intent.

Backlinks	**Medium**	Quality links from food blogs, local websites, and media can strengthen the site's authority.
User Reviews	**High**	Restaurant and food reviews provide useful user-generated content and can support trust and local search visibility.

Priority Order

Mobile-Friendliness → Page Speed → Useful Keywords → Reviews → Quality Backlinks

3. BookMyShow Homepage – SEO Improvement Opportunities

1. Improve Search-Focused Content

Problem: A homepage focused heavily on movie/event discovery may not provide enough descriptive text for important search queries.

Practical Change: Add a short, useful section targeting searches such as **"movies in Ahmedabad," "upcoming movies," "events near me,"** and other major locations.

---

2. Strengthen Internal Linking

Problem: Important movie, cinema, city, and event pages may not receive enough contextual links from prominent homepage sections.

Practical Change: Add clear internal links such as **"Movies in Ahmedabad," "Upcoming Events," "Best Cinemas,"** and popular movie-category pages.

---

3. Improve Image Accessibility

Problem: Promotional banners and movie posters can contain important visual information that search engines may not fully understand from the image alone.

Practical Change: Use meaningful image filenames and descriptive **alt text** instead of generic names such as `banner123.jpg`.

SEO Insight: The goal should be to improve **discoverability without making the homepage look keyword-stuffed**.

4. SEO Checklist for an Instagram Profile

10-Point Instagram SEO Checklist

- Use the **main keyword in the profile name** where it naturally fits.
- Write a clear, keyword-relevant **bio** describing what the account offers.
- Choose a recognizable **username** related to the brand or creator.
- Add relevant **location information** for local businesses.
- Include important keywords naturally in **post captions**.
- Use relevant **hashtags** instead of relying on large numbers of generic hashtags.
- Add descriptive **alt text** to images where available.
- Create content around questions and phrases that the target audience searches for.
- Keep the profile **public and complete** so its content can be discovered.
- Encourage engagement through comments, shares, saves, and meaningful interactions.

Two Factors I Didn't Know Before

1. Descriptive Alt Text
I previously thought Instagram SEO was mainly about hashtags and captions. Alt text can also help describe visual content and improve accessibility.

2. Profile Name as a Search Signal
The profile name is more than just branding. Including a relevant business or service keyword naturally can help users understand what the account is about and improve discoverability.

Final SEO Strategy

Relevant keywords + useful content + strong profile information + accessibility + genuine engagement = better search visibility.
