AI-Based Marketing Planning Framework

1. Instagram – AI-Based Digital Marketing Plan

- **Target Audience:** 16–35-year-old social media users, creators, and small businesses.
- **Main Channels:** Instagram Reels, influencer marketing, Google Ads, email, and social media campaigns.
- **AI Tool: Meta Advantage+** to analyze campaign performance, find high-value audiences, and automatically optimize ads.

Goal: Increase engagement, new users, and daily active users.

2. 5 Unique Food Delivery Campaign Ideas

1. **Campus Food Battle** – Students vote for their favorite restaurant and winning restaurants get promoted.
2. **AI Craving Predictor** – Recommend food based on the user's previous orders and time of day.
3. **Midnight Meal Challenge** – Special late-night offers for college students.
4. **Group Order Festival** – Friends unlock bigger discounts when ordering together.
5. **7-Day Food Discovery** – Give users a different cuisine recommendation every day.

---

3. BookMyShow Customer Journey

Discover Movie → Check Trailer → Select Cinema → Choose Seats → Pay → Receive Ticket → Watch Movie

Touchpoint	AI Marketing Intervention
Movie Discovery	AI recommends movies based on previous bookings and interests.
Checkout/Payment	AI offers personalized discounts or recommends suitable add-ons.

---

4. AI Analytics for a Music Streaming App

1. **Personalized Recommendations** – Analyze listening behavior to create highly relevant playlists and campaigns.
2. **Smart Notification Timing** – AI identifies when each user is most likely to open the app and sends notifications at that time.
3. **Churn Prediction** – AI identifies users becoming inactive and targets them with personalized playlists, offers, or free trials.

Core Framework:
AI Data → Audience Insights → Personalization → Campaign Optimization → Better Engagement
