Marketing Planning Process

1. Marketing Objective – Instagram

App: Instagram
Marketing Objective: Increase new user sign-ups and daily active users by promoting Instagram's Reels and personalized content features.

Objective: Increase new user registrations by **20% within 3 months** through social media advertising, influencer promotions, and referral campaigns.

---

2. One-Page Marketing Plan – Swiggy "Group Order" Feature

Marketing Plan	Details
New Feature	Group Order – allows multiple people to add food to one shared order.
Target Audience	College students, office teams, families, and groups of friends.
Key Message	"Order Together, Enjoy Together!"
Main Objective	Increase group food orders and improve customer engagement.
Social Media	Instagram, Facebook, YouTube Shorts, and Snapchat for short videos and promotional content.
Influencer Marketing	Partner with college and food influencers to demonstrate how Group Order works.
Email Marketing	Send existing users emails explaining the feature and offering a first-group-order discount.
In-App Promotion	Show banners and pop-ups introducing Group Order to existing users.
Offers	Provide discounts such as "10% off your first Group Order."
Timeline	**Week 1:** Teaser campaign → **Week 2:** Feature launch → **Weeks 3–4:** Influencer and discount campaigns → **Month 2:** Analyze results and optimize.
Success Measurement	Number of Group Orders, new users, app engagement, coupon usage, and revenue generated.

3. Five Digital Marketing Channels for a New Music Playlist Feature

1. **Instagram** – Music-loving young audiences can discover the feature through Reels, Stories, and influencer content.
2. **YouTube** – Short videos and music-related content can demonstrate how users can create and share playlists.
3. **Email Marketing** – Personalized emails can recommend playlists based on users' listening preferences.
4. **Push Notifications** – Notifications can quickly inform existing users about new playlists and personalized music recommendations.
5. **Influencer Marketing** – Musicians and creators can promote the feature to their followers and encourage playlist sharing.

---

4. KPIs for a "Refer & Earn" Cricket Streaming Campaign

For an IPL-season **Refer & Earn** campaign, I would track these three KPIs:

1. **New User Sign-ups** – Measures how many new users join the app through referrals.
2. **Referral Code Usage** – Tracks how many users successfully use referral codes to participate in the campaign.
3. **App Downloads from Referrals** – Measures the number of app installations generated through referral links or codes.

Overall goal: Increase new users and app downloads while keeping the cost of acquiring each new customer low.
