Visibility, Traffic & User Engagement

1. Instagram – 3 Ways to Increase Online Visibility

1. **Trending Hashtags** – Relevant hashtags help Instagram content reach users searching for particular topics.
2. **Influencer Posts** – Influencers introduce products, features, or trends to their large follower base.
3. **Google Search Results** – Public Instagram profiles and content can help users discover a brand through Google.

---

2. Flipkart – 3 User Engagement Features

I checked the current Flipkart homepage. It includes sections such as **“Suggested For You,” “Top Value Deals,” “Brands in Spotlight,”** and promotional sale sections.

1. Suggested For You

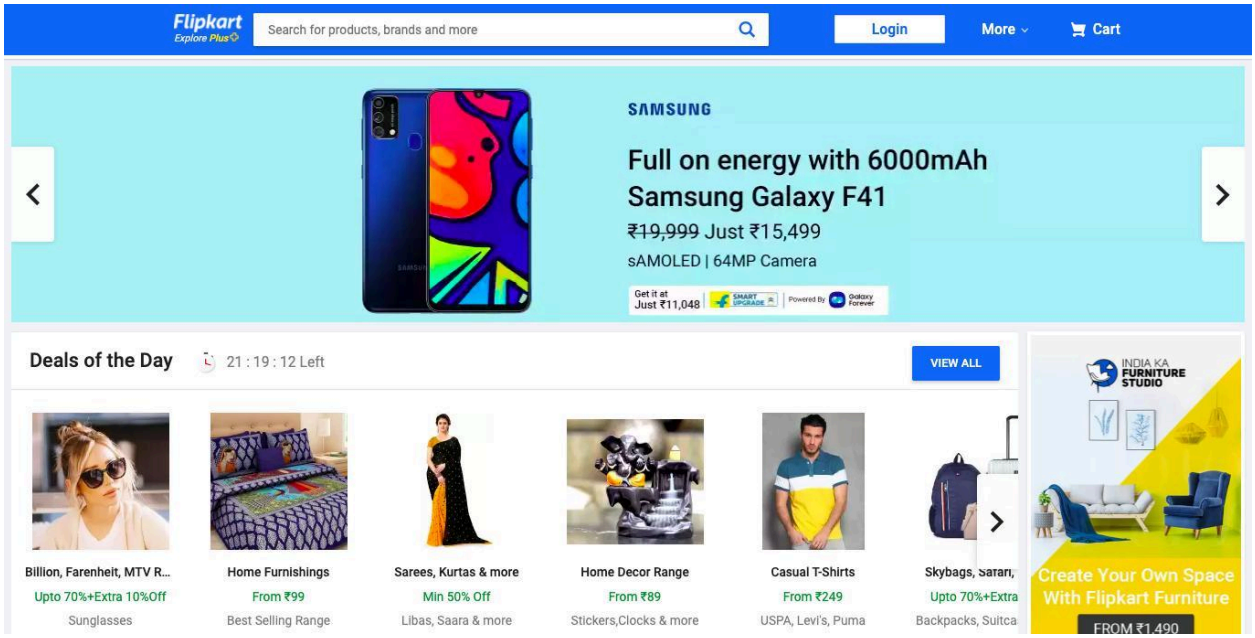

Personalized product recommendations encourage users to continue browsing products that match their interests.

2. Top Value Deals

Discount-focused product sections attract attention and encourage users to explore products and offers.

3. Brands in Spotlight

Highlighting popular brands makes product discovery easier and encourages users to browse different categories.

---

3. Google Trends – IPL vs World Cup vs K-pop

Settings to use:

- **Location:** India
- **Time:** Past 12 months
- **Search:** IPL, World Cup, K-pop
- **Search type:** Web Search

Open Google Trends comparison

Answer for Assignment

World Cup shows the strongest major visibility peak during the period, mainly because the 2026 FIFA World Cup generated huge global and Indian interest. IPL also shows strong seasonal interest, while K-pop generally has a lower search level compared with the two major sporting topics.

For the required screenshot: Open the Google Trends link above, make sure **India + Past 12 months** are selected, and take a screenshot of the graph. This is better than using a made-up graph because Google Trends data changes continuously.
