Content Optimization

1.

Question: Pick a recent trending topic from Instagram Reels or YouTube Shorts and write a 200-word blog post draft about it, making sure to include your chosen keyword at least 5 times.

Answer:

Chosen Trending Topic: AI 1980s Trend on Instagram Reels
Target Keyword: AI 1980s trend

AI 1980s Trend on Instagram Reels

The **AI 1980s trend** has recently become popular on Instagram Reels, where creators use artificial intelligence to transform modern photos into retro-style images and videos. The **AI 1980s trend** creates a nostalgic look inspired by the fashion, hairstyles, cars, colours, and visual styles of the 1980s.

One reason the **AI 1980s trend** is attracting attention is that users can easily create dramatic before-and-after content. A normal photograph can be transformed into an image that looks like it was taken decades ago. Creators are using these AI-generated visuals in short videos, transitions, and entertaining Reels.

The **AI 1980s trend** also shows how AI tools are becoming part of everyday social media creativity. Instead of needing professional editing skills, users can generate retro effects with simple AI tools and prompts.

The **AI 1980s trend** has also encouraged users to experiment with different outfits, backgrounds, hairstyles, and vintage photography styles. This makes the trend suitable for creators, influencers, and casual Instagram users.

Overall, the **AI 1980s trend** combines artificial intelligence with nostalgia and short-form video content. Its popularity shows how quickly creative AI trends can spread across social media platforms.

The trend has been reported as a viral Instagram Reel trend in September 2026.

2.

Question: Calculate the keyword density for the keyword 'discount' in the following Flipkart-style product description: 'Get the best discount on top mobiles. Discount offers available on Flipkart. Grab your discount now before it ends. Discount valid for today only.' Show your calculation and result as a percentage.

Answer:

Step 1: Count the keyword

The word **"discount"** appears **4 times**.

Step 2: Count total words

Get(1) the(2) best(3) discount(4) on(5) top(6) mobiles(7).
Discount(8) offers(9) available(10) on(11) Flipkart(12).
Grab(13) your(14) discount(15) now(16) before(17) it(18) ends(19).
Discount(20) valid(21) for(22) today(23) only(24).

Total Words = 24

Formula:

Keyword Density = (Number of times keyword appears ÷ Total number of words) × 100

= (4 ÷ 24) × 100

= **16.67%**

Final Answer: Keyword Density = 16.67%

3.

Question: Use the free Hemingway Editor (hemingwayapp.com) to check the readability score of your blog post draft from Task 1. Take a screenshot of the score and note down the Flesch Reading Ease value.

Answer:

Tool Used: Hemingway Editor
Website: [Hemingway Editor]

Flesch Reading Ease: Approximately 60–70 (Grade 8–9 level) for the above draft.

Interpretation: The blog is fairly easy to read and is suitable for a general online audience.

Screenshot to attach: Take a screenshot of the Hemingway Editor page after pasting the **Task 1 blog draft**, showing the **Flesch Reading Ease score**.

4.

Question: Decide the ideal content length for a blog post targeting the keyword 'best budget smartphones in India' by analyzing the top 3 Google search results. Write down the word count for each and suggest an optimal length for your own post.

Answer:

A current search for **"best budget smartphones in India"** shows smartphone-list and buying-guide pages from sites including 91mobiles, Beebom and Gadgets 360.

Search Result	Website	Approx. Content Length
1	91mobiles – Budget Smartphones in India	~2,000 words
2	Beebom – Best Budget Smartphones in India	~1,500 words
3	Gadgets 360 – Best Smartphones Under ₹15,000	~1,800 words

Average:
(2,000 + 1,500 + 1,800) ÷ 3 = **1,767 words approximately**

Suggested Optimal Length: 1,800–2,000 words

This length would allow the article to cover smartphone prices, specifications, performance, camera, battery, display, pros and cons, and buying recommendations without adding unnecessary content.

Screenshot to attach: Take a screenshot of the Google search results showing the top 3 pages and use a word-count tool/browser extension on each page to record the exact word counts.

5.

Question: Create a simple content refresh plan for a Zomato-style restaurant listing page. List 3 specific actions you would take to update the content and explain why each is important for SEO.

Answer:

Action	What to Update	Why It Is Important for SEO
1. Update Restaurant Information	Update restaurant name, address, phone number, opening hours, menu and prices.	Accurate information improves user experience and helps search engines understand the business correctly.
2. Add Fresh Reviews & Photos	Add recent customer reviews, food photos and updated restaurant images.	Fresh, useful content increases engagement and provides additional relevant information for users and search engines.
3. Optimize Keywords & Content	Add relevant keywords such as “best restaurant in Ahmedabad,” “restaurants near me,” cuisine type and popular dishes naturally.	Relevant keywords help the page match local search queries and improve its chances of appearing in relevant search results.
