Link Building Strategies

Q-1. Write a short email pitching a guest post to a popular blog.

Selected Niche: Digital Marketing / SEO

Selected Website: KP Digitally – Digital Marketing Website

Proposed Article Topic: “10 Practical SEO Strategies for Beginners to Improve Google Rankings in 2026”

Subject: Guest Post Proposal – Practical SEO Strategies for Beginners

Hello KP Digitally Team,

I would like to contribute a guest post titled “10 Practical SEO Strategies for Beginners to Improve Google Rankings in 2026.”

The article will cover keyword research, on-page SEO, internal linking, technical SEO, and backlinks. I believe this topic would be useful to your digital marketing audience, and I would be happy to create an original, well-researched article according to your guidelines.

Thank you for considering my proposal.

Best regards,
Raj Patel

Why this is a good guest-post opportunity:

KP Digitally accepts contributions related to digital marketing, SEO, and web development, making it relevant to the proposed topic.

Q-2. List websites linking to three food delivery or e-commerce websites.

Tool Used: Ahrefs Free Backlink Checker

A. Zomato.com

Linking Website	Type of Content	Link Purpose

YourStory.com	Startup/food-tech article	Reference to Zomato's company and history
ResearchGate.net	Research paper/reference	Zomato used as a case study or source
HungryForever.com	Food-tech article	Reference to Zomato's food-delivery business

B. Swiggy.com

Linking Website	Type of Content	Link Purpose
Inc42.com	Startup/technology article	Company and business reference
YourStory.com	Startup/food-tech article	Company history and business information
Wikipedia.org	Company information/reference	General company reference

C. Flipkart.com

Linking Website	Type of Content	Link Purpose
Wikipedia.org	Company information page	General company reference
Inc42.com	Business/news article	Reference to Flipkart's business
YourStory.com	Startup/business article	Company history and business developments

Conclusion:

Zomato receives backlinks from food blogs, startup publications, and research websites. Swiggy receives links from startup publications, technology websites, and reference pages. Flipkart receives links from news websites, business publications, and reference pages.

Note: These are the examples listed in the assignment PDF. Verify current referring URLs using a backlink checker before submission.

Q-3. Find a broken link and draft a message suggesting your content as a replacement.

Resource Page Selected: Checkli – “How to Write the Perfect Meta Descriptions for SEO”

Broken/Outdated Resource: SEOmofo Snippet Optimizer
Original Link: https://seomofo.com/snippet-optimizer.html

Suggested Replacement Content: “Free SEO Meta Title & Meta Description Optimization Guide”

The guide could include:

- Recommended title length
- Meta description best practices
- Keyword placement
- Call-to-action examples
- Mobile and desktop examples
- SERP preview examples
- Free tools for checking titles and descriptions

Email Draft:

Subject: Suggestion for an Updated SEO Resource

Hello,

I was reading your “How to Write the Perfect Meta Descriptions for SEO” checklist and noticed that the SEOmofo snippet optimizer link appears to be outdated or no longer available in its original form.

I have created a relevant resource titled “Free SEO Meta Title & Meta Description Optimization Guide,” which explains how to write and optimize titles and meta descriptions with practical examples.

If you think it would be useful for your readers, you could consider replacing the outdated SEOmofo reference with this resource.

Thank you for maintaining such a useful SEO checklist.

Best regards,
Raj

Why this works:

The message identifies a problem and offers a relevant replacement rather than immediately asking for a backlink. This is the basic principle of broken link building.

Q-4. Apply the Skyscraper technique to an existing article.

Original Article Selected: TechRadar – “The 14 Best SEO Tools of 2026”

The Skyscraper technique means finding an existing useful piece of content and creating a more comprehensive, valuable, and updated version.

Improvement 1: Add Practical Beginner Tutorials

The original article compares different SEO tools. My improved article would include step-by-step tutorials for using each tool.

Example: How to Use Ahrefs for Backlink Research

1. Enter the website URL.
2. Open the Backlinks report.
3. Check referring domains and URLs.
4. Analyze anchor text.
5. Find link-building opportunities.

Improvement 2: Add Comparison Tables and 2026 Use Cases

Tool	Best For	Free Version	Beginner Friendly
Ahrefs	Backlink analysis	Limited	Yes
Semrush	All-in-one SEO	Limited	Yes
Moz	SEO beginners	Limited	Very easy
Screaming Frog	Technical SEO	Yes, with limits	Moderate
Google Search Console	Website performance	Yes	Easy

How I Would Promote My Improved Article

1. Competitor Backlink Research: I would use Ahrefs to identify websites linking to similar SEO-tool articles. Then I would contact those websites and explain that I had created a more comprehensive, updated guide with practical tutorials and comparison tables.

2. Social and Community Promotion: I would share the article on LinkedIn, X, relevant SEO communities, digital marketing groups, Reddit discussions where appropriate, and through email outreach to SEO bloggers.

Expected Result:

The improved article could attract more readers, earn relevant backlinks, increase referral traffic, and build website authority.

Q-5. Draft a response to a journalist's query and explain why it would be useful.

Query Topic: “What will be the most influential trend in SEO in 2026?”

Draft Response

The biggest SEO trend in 2026 will be optimizing for AI-driven search experiences rather than focusing only on traditional Google rankings.

Search users are increasingly getting direct answers through AI Overviews and other AI-powered search experiences. Because of this, businesses need to create content that is accurate, well-structured, genuinely useful, and supported by first-hand expertise.

I believe successful SEO in 2026 will combine traditional SEO fundamentals—technical optimization, keyword research, internal linking, and quality backlinks—with original insights, strong topical authority, and content that provides information AI systems can confidently understand and reference.

The key shift is simple: SEO is no longer only about ranking a webpage; it is also about becoming a reliable source that search and AI systems want to cite.
