I noticed that your article mentions Spotify, but the mention doesn't currently include a clickable link. Would you consider linking the Spotify mention to the official Spotify website?

Q-5.

Use ChatGPT to generate a list of 3 creative digital PR strategies for increasing brand mentions for a new fashion e-commerce startup targeting Gen Z in India.

Ans:

3 Creative Digital PR Strategies for a Gen Z Fashion E-Commerce Startup

1. Social Media Collaboration Campaign

Partner with popular Instagram creators who have a Gen Z audience. Create short styling videos such as "3 Ways to Style One Outfit" or "Under ₹999 Gen Z Looks." Encourage creators to tag the startup and use a unique campaign hashtag. This can increase social mentions, shares, website traffic, and brand awareness.

2. Gen Z Influencer Outreach

Build relationships with micro-influencers, college fashion creators, and emerging lifestyle influencers in India. Send them selected products and ask them to create authentic outfit

reviews, unboxing videos, and styling content. Micro-influencers can help the brand reach niche communities and generate genuine conversations around the products.

3. Viral Fashion Challenge

Launch a creative challenge such as **#MyStyleMyWay Challenge**, where users create their own outfit combinations and post them on Instagram or other social platforms. Offer rewards such as discount vouchers, free products, or a chance to be featured on the brand's official account. Encourage participants to tag friends and the brand, helping the challenge generate more user-generated content and online brand mentions.
